Profile

I'm a passionate and dynamic software development professional with 13+ years of experience specializing in e-commerce, management systems, and customer service solutions. I blend creative thinking with practical execution to deliver impactful results. By deeply understanding target audiences and leveraging strategic marketing insights, I enhance client interactions and deliver services that create lasting value. My goal is to foster long-term relationships and continuously drive innovation and excellence.

Employment History

Engineering Lead, VenueSumo

Apr 2026 — Present ○ Gold Coast, Queensland, Australia

Led and mentored an offshore engineering team, strengthening collaboration and productivity.

Planned and designed the target solution, then led the migration of platform infrastructure from the legacy environment to a new Azure architecture.

Optimized Azure cloud costs while supporting global platform expansion through DevOps solutions that improved operational efficiency.

Built and migrated CI/CD pipelines to the new Azure infrastructure, streamlining the development process.

Delivered platform feature improvements and bug fixes to ensure a seamless user experience.

- **Clouds:** Microsoft Azure
- **Skills & Knowledges:** Team Leadership, Solution Design, DevOps, CI/CD Pipelines, Azure Infrastructure Migration, Azure Cost Optimization, Github Action, Terraform, .Net framework, .Net core, Microservice

Managing Director, Anvris

Dec 2025 — Present ○ Ho Chi Minh, Vietnam

Founded and lead Anvris, a technology and AI solutions studio that helps companies build intelligent internal systems to improve operational efficiency and decision-making.

Architect scalable systems, integrate AI into business workflows, and build high-impact engineering teams.

Provide solution consulting and system architecture for digital platforms, particularly e-learning, HRMS, and e-commerce.

- **Industries:** FinTech, Healthcare, Education, Digital Commerce
- **Skills & Knowledges:** Scalable System Architecture, AI Workflow Integration, Engineering Team Building, Solution Consulting

Development Lead, Sunwest Bank

Mar 2025 — Present ○ Sandy, Utah, United States

Leading the design and delivery of secure, scalable banking systems. I work closely with business and engineering teams to translate complex financial requirements into robust,

production-ready solutions, with a strong focus on system reliability, clean architecture, and long-term maintainability.

- **Programming languages:** React, HTML, CSS, jQuery, Typescript, Terraform
- **Architectures:** Design Patterns, Microservices, Docker, Message Queue, Clean Architecture
- **Databases:** CosmosDB, SQL Server
- **Clouds:** Kubernetes, Microsoft Azure
- **Skills & Knowledges:** Technical Solution Design, Team Management, Product Planning, Payment Gateway, Banking check/queue system

Team Lead, Netwealth

Nov 2021 — Mar 2025 ○ Melbourne, Victoria, Australia

Contributed to the development and delivery of Netwealth's suite of innovative solutions for portfolio administration, superannuation, retirement planning, and investment management.

Defined and established development guidelines, architectural best practices, and solution designs to ensure high-quality code for international share trading projects using FIX Engine.

Provided technical troubleshooting and support to a team of developers, ensuring smooth project execution.

Collaborated cross-functionally to drive innovation and implement advanced solutions.

Led and mentored a team of software engineers, successfully managing the development of a major software project, delivering it on time and within budget.

- **Programming languages:** .Net, AngularJS, Angular 8, Angular 19, Blazor, HTML, CSS, jQuery, Terraform, Typescript
- **Architectures:** MSMQ, CQRS, Kafka, Clean Architecture, Design Patterns, Microservices, WCF, Monolith
- **Databases:** SQL Server, CosmosDB
- **Clouds:** Microsoft Azure
- **Skills & Knowledges:** Technical Solution Design, Scrum Master, Agile Methodologies, ASX Share Trading, International Share Trading, Foreign Exchange, FIX Engine, Third Parties Integration, Websocket

Offshore Lead, Ready Tech

Jul 2018 — Nov 2021 ○ Melbourne, Victoria, Australia

Developed advanced technology solutions to enhance employee performance, engagement, retention, and learning throughout the entire employee lifecycle.

Led both development and strategic initiatives, delivering tools that empower clients to execute business strategies, foster talent development, and enhance collaboration.

Architected and implemented solutions using Angular, .NET, and AWS to streamline HR processes, improving workforce management efficiency for enterprises.

Identified, evaluated, and partnered with an offshore development company to support Cognology's expansion.

Led the recruitment process, including candidate selection and interviews, to build a high-performing offshore team.

Managed offshore team operations, overseeing project progress, team coordination, and feature development.

Facilitated communication between the offshore team and third-party stakeholders, ensuring seamless collaboration.

Assessed team performance and implemented development plans to drive continuous improvement.

- **Programming languages:** .Net, AngularJS, Angular 13, HTML, CSS, jQuery, Typescript
- **Architectures:** MVC, MSMQ, CQRS, Design Patterns, Monolith
- **Databases:** SQL Server
- **Clouds:** AWS
- **Skills & Knowledges:** Technical Solution Design, Scrum Master, Agile Methodologies, Human Resource Management, Third Parties Integration, Onboarding Process

Tech Lead, Future Business System

Aug 2016 — Jul 2018 ○ Cheltenham, Victoria, Australia

Played a key role in designing and delivering an enterprise management solution to help clients maximize business potential.

Led the end-to-end development of e-commerce projects, from system architecture to customer support.

Contributed to the development of Harmony, an Australian-built platform comprising over 60 integrated software modules.

Designed and implemented advanced enterprise management systems for the retail and wholesale sectors, covering product development, manufacturing, supply chain management, inventory control, financial operations, wholesale distribution, retail management, point-of-sale systems, and e-commerce platforms.

Ensured seamless technology integration and provided expert customer support to enhance client success.

- **Programming languages:** ASP .Net, AngularJS, HTML, CSS, jQuery
- **Architectures:** MVC, Design Patterns, Monolith
- **Database:** SQL Server
- **CMS:** Umbraco
- **Skills & Knowledges:** Technical Solution Design, E-Commerce System, Warehouse Management, Third Parties Integration, Payment Gateway

Senior Software Developer, Coles

Nov 2015 — Feb 2016 ○ Hawthorn, Victoria, Australia

Designed and developed an advanced e-commerce and warehouse management system using Sitecore CMS, enhancing online shopping experiences and warehouse efficiency.

Implemented seamless product management, real-time inventory tracking, and personalized user experiences to improve order fulfillment and customer satisfaction.

Optimized system architecture to ensure scalability, robustness, and high performance for growing businesses.

- **Programming languages:** ASP .Net, AngularJS, HTML, CSS, jQuery
- **Architectures:** MVC, Design Patterns, Monolith
- **Database:** SQL Server
- **CMS:** Sitecore
- **Skills & Knowledges:** Technical Solution Design, E-Commerce System, Warehouse Management, Third Parties Integration, Payment Gateway

Software Developer, SmartOSC

Oct 2015 — Apr 2016 ○ Hanoi, Vietnam

Worked on multiple e-commerce platform projects, gaining extensive experience in developing and optimizing online retail solutions.

Trained in Sitecore, a leading e-commerce CMS widely used by Australian clients, built on .NET technology.

- **Programming languages:** ASP .Net, AngularJS, HTML, CSS, jQuery
- **Architectures:** MVC, Design Patterns, Monolith
- **Database:** SQL Server
- **CMS:** Sitecore
- **Skills & Knowledges:** Technical Solution Design, E-Commerce System, Warehouse Management

Software Developer | Graduate Software Developer, FPT Software

Mar 2013 — Jul 2015 ○ Da Nang, Vietnam

Began my career in software development, cultivating a strong passion for programming.

Worked on projects such as RamQuest One, Pavaso, ADB, and Cleopath, primarily focused on software solutions for the title insurance industry in the U.S.

Developed applications using .NET technologies, including WinForms and WCF.

Contributed to re-architecting legacy systems, transitioning from desktop-based to web-based UIs, and deploying solutions to the cloud as SaaS.

- **Programming languages:** ASP .Net, .Net Winform, HTML, jQuery
- **Architectures:** MVC, Design Patterns, Monolith
- **Databases:** SQL Server
- **Skills & Knowledges:** USA Title Insurance

Education

Central Queensland University, Master of Information Technology

May 2016 — May 2018 ○ Melbourne, Victoria, Australia

FPT University, Bachelor of Software Engineering

Sep 2010 — Aug 2014 ○ Da Nang, Vietnam

Certificates

Microsoft Product Strategy and Roadmapping

Microsoft Product Design and UX/UI Fundamentals

Microsoft Product Launch and Post-Launch Management

Microsoft AI Product Manager

Professional Scrum Master II

Professional Scrum Master I

Microsoft Certified: Azure Fundamentals

Microsoft Certified: Azure Developer Associate

Microsoft Certified Solutions Associate

Microsoft Certified Professional

Programming in HTML5 with JavaScript and CSS3
